### Bible Printing and Distribution

#### PROGRESS

- The Yala New Testament and book of Psalms have been printed and made available to the community.

#### PRAYERS

- Give praise that the Yala New Testament and Psalms are being used for worship in churches and homes.
- Pray that the Shekgalagari New Testament translation and the Khwedam panoramic Bible stories in Botswana will be ready for printing soon.

The long-awaited reprint of the Yala New Testament and the newly translated book of Psalms are being dedicated in Nigeria this month. Thank you for your gifts that made this possible. Rev. Linus Otronyi reports, "When the Yala Scriptures are read in church, everyone understands the message. In fact, there is increased attendance, and demand for the Yala Bible and other materials is higher."

Translation is only the first step in a language program. Scripture cannot be effective unless it is readily available for people to use and study. At a seminar focused on how to read the Yala language and how to effectively communicate the Gospel an attendee commented, "So there is treasure here and it has been hidden from us all this while!"

Scripture is still hidden from many language communities. Your gifts ensure that God's Word is accessible to those eager to hold the Bible in their hands.
